

Chrome Trim Changes

Older-style Dynamo chrome trim (Ball View Door, Ball Return, Triangle) is no longer available. The replacement looks practically identical, but attaches in a slightly different way. Here is the difference when viewed in cross-section

Existing Dynamo tables have a groove which will accommodate T-molding with a leg of approximately 3.5mm

Approx 3.5 mm

The new extrusion can fit Dynamo tables designed for the old molding, but you will need to shave approx 1mm to 1.5mm from the leg. If you try to pound or force this trim to fit the shallow groove, you could damage your table.

Approx 5 mm
