

About air hockey goal ends

Older tables use the Quick-Entry Goal End—Secured with Bolt (pictured at left)
VERY old tables use a similar goal end with a bolt hole in each lower corner. Your table can easily be modified to use the Quick Entry goal end.

Current tables use the Hinged Goal End—Secured with a lock (pictured at right)
Notice the larger hole for the lock and the horizontal hinge.
Tables that use the Quick Entry goal end require extensive modification to use the hinged goal end.
We do not recommend making this change.

AVOID RESTOCK FEES
PLEASE MAKE SURE YOU ORDER THE CORRECT GOAL END THE FIRST TIME.
ASK IF YOU ARE NOT SURE.
